A morphologically coded 3sg inflection is sometimes reanalysed as part of the stem (Watkin's 1962; Koch 1994)

$(e)n > (e)n-\emptyset$

3sg > stem-3sg

The structure of the copula paradigm

The paradigm of the copula is the source for the inflection of verbs based on past stem.

Present enclitic copula		Inflection of past stem verbs

1SG	= <i>nā</i>	- <i>ā</i>
-----	-------------	------------

2SG	= <i>nī</i>	- <i>ī</i>

3SG.M	= <i>n-∅</i> , = <i>ā-∅</i>	- <i>∅</i>
